GreenThis book is written in such a way that it actually doesn't leave you a choice but to read it slowly, make multiple re-reads of many parts and to really go deep inside you and question yourself. What I like about this book is that the author shares his life story and his path to enlightenment. It is not written just for the sake of having a book written, it is a true story with a deep meaning. He talks about his experience of enlightenment. Well, I experienced it couple of years ago, but it has never returned. Since then I am trying to get it back. I think this book is what I was looking for to help me experience it once again and to never ever let it go.3 of 3 people found the following review helpful. I really enjoyed this read - I'm very much into personal growth ...By Neil CannonI really enjoyed this read - I'm very much into personal growth and this is in tune with a lot I have learned from Tony Robbins, and Corey visits some fresh new concepts too. I love the idea of living consciously versus unconsciously and in a proactive state rather than a reactive state. We live such busy and hectic lives these days, yet are unproductive because we're in reactive mode most of the time. Corey includes exercises to do at the end of each section too which is really useful. I highly recommend a read!0 of 0 people found the following review helpful. InspiringBy Lisa S.Not my usual type of read, but sometimes it helps to expand your mind. This is one of those books that make you want to take control of your life and YOU live it, not it live YOU! Great encouragement and many things to leave you thinking about. Excellent book to read with an open mind if you feel your life is in a rut and you want to change it.

True growth comes from moments of self-realization. These peak experiences shatter the confines of our minds and extend us further than our perception previously allowed. My hope and intent for this book is that it will help you to move forward on your personal path and to experience more of these occasions of awakening, realization, and enlightenment. To make fulfillment your permanent state, to leave meaningful worth with you wherever you go, to bring ultimate awareness to your everyday experience. To encourage and trigger more of these moments of deeper fulfillment and lasting worth, all chapters provide short, easy-to-read contemplations, each followed by a question to ask yourself. Every contemplation is intended to provoke thought, to frame a thought process for its accompanying

question. This is your journey and now is your time.

About the AuthorAfter growing up with lack I became successful at the age of 23 owning my own restaurant and nightclub. I eventually sabotaged myself because I was unsuccessful internally. I became addicted to drugs and lost everything. I was nearly homeless in 2011, had no money or even a car and in January of 2012 I had a profound spiritual experience where I connected to the oneness of all life. I was left with a deep sense of unconditional love for everything and everyone. I went into deep meditation for almost 4 years and wrote the insights and realizations that came to me during that time. I rebuilt my life from the inside out and am now in the top 7% in my industry. I got back 10 times the material things but more importantly am enjoying deep, loving relationships in my life.
